- Make Easter cakes and share them with your family.
- Go for a long walk with your family.
- Wear your pyjamas all day!
- Help your family to cook a delicious meal.
- Make a den out of duvets and blankets.

- There are lots of birds and animals out this time of year – see how many you can spot in your garden or local park.
- Have a board game night and stay up late.
- Use your Easter egg boxes to make something interesting.
- Have an Easter egg hunt in your garden.
- Watch your favourite film and eat some Easter chocolate.
- Do something kind for a loved one.
- Help out the creepy crawlies in your garden and make a bug hotel!

Easter is a special time of the year for Christians.

Share with your teacher how you and your family choose to celebrate it.

Can you find out why this festival is so special to Christians?  
Make a video, PowerPoint, poster or story.

You could also try some of the crafts and suggested attached!

★ ★ ★ ★ WEEKEND CHALLENGE 4 ★ ★ ★ ★

Why not put those bits and bobs lying around the house to use this weekend by exploring the countless pleasures of creating your very own musical instrument.

We look forward to seeing your creations

# WEEKEND CHALLENGE 3

## History Detectives

For the weekend challenge this week, we will be focusing on history. Miss Porter would like you to research a local person of interest - Shakespeare, Jephson or Whittle are some names for inspiration.

You can draw a picture, create a non chronological report, show off your computing skills and create a PowerPoint or see if you can write a set of clues for us to try and guess who your person of interest is.

**Dr Henry Jephson**

**Sir William Shakespeare**

**Sir Frank Whittle**

# ★ ★ ★ ★ WEEKEND CHALLENGE 2 ★ ★ ★ ★

Here is a lovely science activity you can do at home. Children of all ages can have a go, but you will need adult supervision as scissors will be needed. I would love to see some pictures of your parachute creations, please email them to the office: [admin@lillingtonprimary.com](mailto:admin@lillingtonprimary.com).

## Awe and Wonder Plastic Bag Parachutes

You will need:  A square of plastic bag material  A plastic person  String  A hole punch  Scissors

### The Science Bit

When you release the parachute the weight pulls down on the strings and opens up a large surface area of material that slows down the person. The larger the surface area the more air resistance and the slower the parachute will drop.

### Method:

1. Cut off across the corners of the square, creating an octagon shape.
2. Hole punch in the middle of each side.
3. Put a piece of string through each of the 8 holes and tie.
4. Gather the 8 pieces of string together and tie to your plastic person.
5. Cut out a small circle from the centre of your parachute to let air pass through gently.
6. Get up somewhere high, on top of a climbing frame or up some stairs.
7. Hold the centre of your parachute, with the person underneath. Let go and watch how they travel to the ground.
8. Does the parachute open? Does the person travel fast or slow? Does the person go straight down or to one side? Does it spin? What could you do differently?

## Blindfolded Obstacle Course Orienteering Activity

**Equipment:** blindfolds – per pair; cones, low level hurdles, hoops, beanbags

**Preparation and set-up:** Use the equipment to set up a range of different courses for the children to direct their partner through - see the example course shown.

### What to do:

- Organise the children into pairs, with a blindfold per pair.
- Prior to having a go at the obstacle course blindfolded, let the children familiarise themselves with wearing a blindfold and directing one another. The first command they should practise is 'Stop'.
- Use one of the courses, already set up, to explain the activity.
- Children take it in turns to direct their blindfolded partner through the course.
- The aim is for the blindfolded child to work their way through the course, without touching the equipment.
- Encourage the use of directional language, such as forwards, backwards, left and right.

### Directions:

1. Zigzag in-between the cones.
2. Step inside each of the hoops.
3. Step over the hurdles.
4. Walk 360° around the beanbag.

### Differentiation:

- The courses that you set up can be as easy or as challenging as you wish to make them, by varying the number of obstacles you include and how close together or far apart the equipment is laid out.
- Add a timed element for completing the courses. For this, you may want to have several smaller courses set out. To ensure safety, emphasise that the children are racing against a clock and not other pairs.
- Children set up their own courses, to gently guide their partner through.

Emphasise to children the importance of always keeping their blindfolded partner safe, by getting them to stop if there are any objects or obstacles in their way that might be a trip hazard or that they could bang into.

Here you'll find a super simple and easy to use blindfold challenge for your own children.

This orienteering activity is a perfect way to encourage teamwork with your children, as they partner up and guide each other through the activity.

It is also the first steps into simple computer programming!

# YEAR TWO - PEAK

Year 2 have been identifying characteristics of invertebrates in their science lessons this week. They have looked at arachnids, insects, crustaceans and others. As part of their learning, they had to find out whether the invertebrates had soft or hard bodies, segmented bodies and whether they had antennae.

## Invertebrates

### Protozoa

The protozoa are one-celled animals and the smallest of all animals. Most of them can only be seen under a microscope.

### Annelids

The annelids are also called "ringed worms" and they are segmented worms.

### Mollusks

Mollusks comprise a group of soft-bodied animals that includes snails, clams, and sea slugs. The most common characteristic of most mollusks is their shell!

### Echinoderms

Starfish belong to a group of animals called echinoderms. This means "spiny skinned."

### Crustaceans

Crustaceans have a hard, external shell which protects their body. Crustaceans have a head and abdomen.

### Arachnids

All arachnids have eight legs. The word arachnids means "spider" in Greek.

### Insects

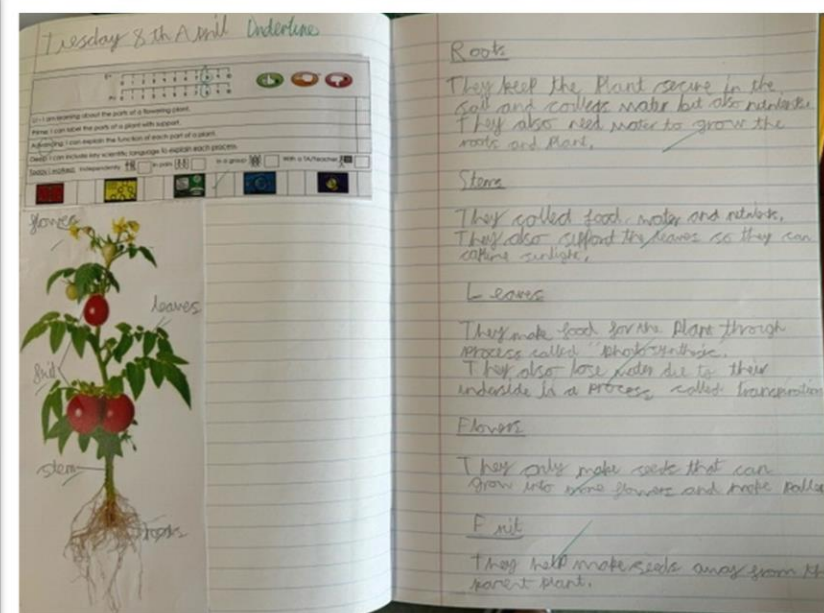

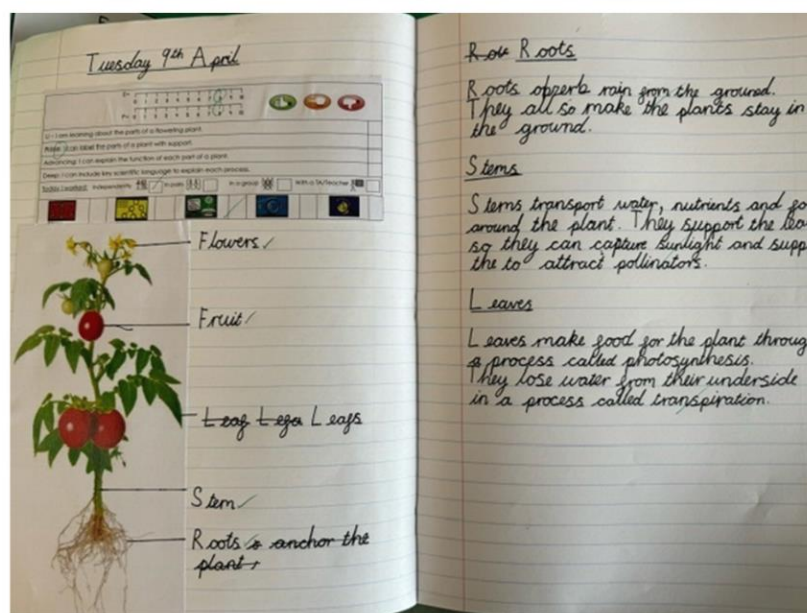

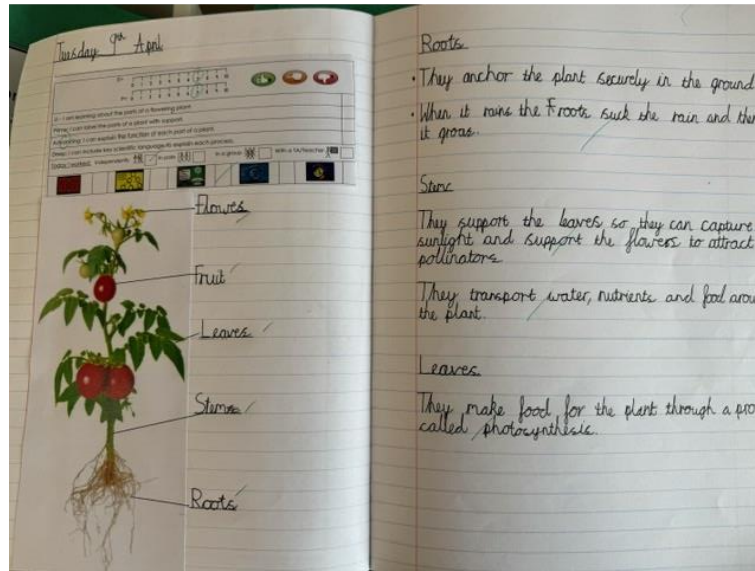

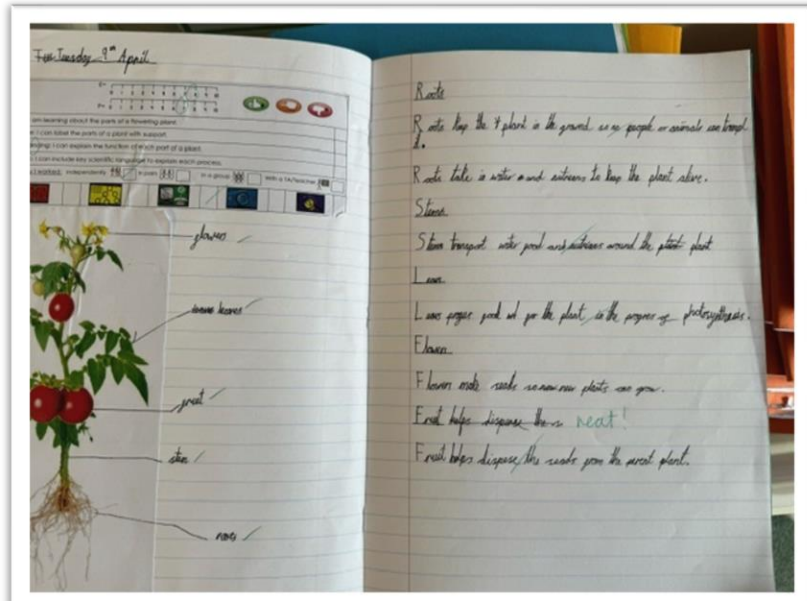

Insects have an exoskeleton, a three-part body, three pairs of jointed legs, compound eyes, and two antennae.

**Invertebrates are animals without a backbone!**

# YEAR THREE - DREW

Year 3 have started their new topic Emperors and Empires. In science we have began looking a plant nutrition and reproduction. So far we have identified the different parts of a plant and their function!

# YEAR FOUR - HOPPER

# YEAR FIVE - KING

King Class have been using drama to develop their understanding of the class text - Poppy, Waldo and the Giant. After learning parts of the text, they had to do freeze frames to show what is happening. The children have also 'boxed up' the story so they know all the different stages of a narrative.

# YEAR SIX - FITZGERALD

This week in Fitzgerald Class, the children have been deepening their understanding of character and setting through drama. Activities such as hot-seating and group role play enabled the class to connect with different characters' feelings, thoughts and even plans whilst showcasing their highly impressive theatrical skills!

What is Family Learning? Family Learning offers courses and workshops for parents and carers to develop their understanding of how their children learn, through meaningful, practical activities. We help families to live their best lives by supporting parents to give their children the best start through a rich home learning environment. We empower parents through the acquisition of knowledge, understanding and skills to support their children's learning and development. We help learners to progress to further learning and employment — to contribute to a thriving local economy. Our courses and workshops are informed by research based approaches to education.
